

Installation

Install the Hot Dog Roller in a level position. Connect the lead-in cord to a suitable outlet of correct voltage. (120V)

Operating Procedures

1. Place hot dogs on rollers. Turn heat to designated temperature. Left knob controls the heat of one set of five (5) rollers and the right controls the other set of five (5) rollers.
2. For low heat, set controls to **LOW** (1-4) using one or both sets of rollers. For high capacity, set controls, to **MEDIUM** (5-8) or **HIGH** (9-12) using both sets of rollers.

Care and Cleaning Instructions

Although corrosion resistant, stainless steel should be cleaned daily to prevent pitting. Do **NOT** use steel wool to clean; stainless steel wool can be used.

1. **!!UNPLUG THE POWER CORD FROM THE OUTLET!!**
2. Remove any remaining hot dogs from the rollers.
3. Remove drip pans and clean thoroughly.
4. Use a mild detergent, soap and water, or soda-water to clean the roller grill. Rinse after washing and dry thoroughly before using.
5. For stubborn spots or stains a mild abrasive cleaner can be used. When applying abrasive cleaners always rub in the direction of the grain to preserve metal finish.
6. When unit has been cleaned, rinsed, and dried, reinsert drip pans beneath the rollers.
7. Unit is now ready for operation.
